## PROJECTS

---

### **Alpa**

Alpa automates model-parallel training of large deep learning (DL) models by generating execution plans that unify data, operator, and pipeline parallelism. Alpa makes it simple to train and serve large models like GPT-3.

### **csdiy.wiki**

csdiy.wiki collects various learning materials and online courses in computer science (CS) from top universities in the world. It covers almost all the areas in CS and provides a comprehensive guidance for anyone who would like to self-learn CS. This project has repeatedly ranked the top popular repository in Github Trending.
